

There's Always an Alternative

A range of **home & lifestyle products** designed to be kinder to our planet

Making the switch to becoming an environmentally responsible brand is about more than using trendy eco wording, it's about making long-term, sustainable goals.

It's important to understand what these terms really mean so that your brand can position itself authentically.

You will find these roundels on each page so you can quickly identify the product's eco credentials.

Please note:

Wherever you see the Geiger logo on a product is one of the many places you can print your logo.

Products that can be used repeatedly. Use over disposable products to reduce the amount of waste and help sustain the environment for future generations.

A biodegradable product has the ability to break down, safely and relatively quickly by biological means, into the raw materials of nature and disappear into the environment.

Fairtrade changes the way trade works through better prices, decent working conditions and a fairer deal for farmers and workers in developing countries.

Recyclable materials are made of raw materials that can be reprocessed and used again. Such materials include glass, paper, metal, and limited types of plastic.

Organic materials do not rely on synthetic pesticides, herbicides and fertilizers that can deplete the soil of valuable nutrients and increase environmental degradation.

Recycling is the process of collecting and processing materials that would otherwise be thrown away as trash and turning them into new products. Recycling prevents and reduces the consumption of fresh raw materials.

Ethical materials products are manufactured without using process material, person or animal in an unethical or immoral way.

Renewable materials are great for the environment as the natural resource can replenish itself generation after generation.

Social enterprises are businesses that put the interests of people and planet ahead of shareholder gain. These businesses are driven by a social/environmental mission and reinvest profits into creating positive social change.

Working with sector partners, we lead the way in formalising an agreed definition of what constitutes genuine social enterprise, the essence of which has since been adopted in several other countries.

Plastic Bank

With this RPET beach set you support Plastic Bank - a social enterprise headquartered in Canada which aims to clean up plastic waste from our oceans while providing valuable opportunities for impoverished communities. Plastic Bank offers residents of Haiti, the Philippines and Indonesia cash or vouchers in exchange for the waste they collect, which then goes on to be recycled into products.

As we continue to create more plastic waste, by 2050 there will be more plastic in the ocean than fish. By collecting, recycling, and reprocessing ocean-bound plastic waste – and supporting collector communities along the way – we can reduce our need for virgin plastic while creating lasting environmental, social and economic impact.
